

Tubular Piles

Cairnhill Structures offer a full range of fabricated products to compliment both Civil and Piling contractors. From our 120,000 square feet of fabrication space located in Coatbridge and our Global Partnership agreements we are able to offer a complete range of engineered solutions.

We can offer both Spiral and LSAW options for stock quantities and also large scale projects. We look to add value through every stage of the procurement process and ensure all risks are managed appropriately.

Additionally we can offer the supply of a full range of structural steel plates, sections and heavy wall tubulars as well as plasma cut profiles and a full machining service.

Furthermore, we can also offer design and engineering consultation to ensure you the most cost effective solution is adopted.

Our fully bespoke service covers all aspects of the project lifecycle including Raw Material Purchase, Manufacture, Testing, Painting, Logistics, Shipping and agreeable Commercial Terms.

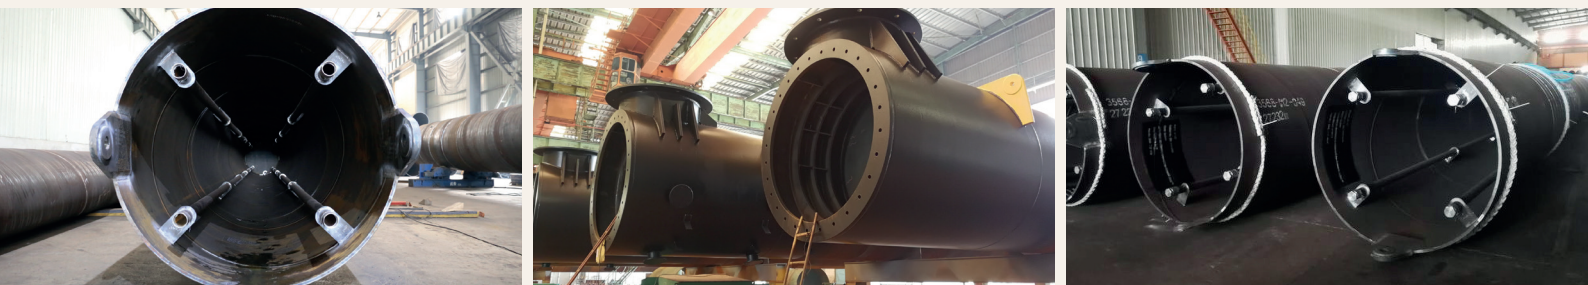

Our Products now Include:

- Tubular Piles – SSAW, LSAW
- Fabricated Piles – Fenders, Dolphins, Grout Pipes
- Hot Rolled Sheet Piles – Complete range of Z Piles and U Piles.
- Cold Rolled Sheet Piles
- Steel H Pile Combination Walls
- Tie Rod Systems
- Paint Systems
- Cathodic Protection
- Site Services – Full approved Welders immediately available.
