Cairnhill Metalwork Division are a leading supplier of both Primary & Secondary steelwork to many industries throughout the United Kingdom.

We can offer the full package from design and fabrication to site erection. We pride ourselves in our commitment to high-quality standards, robust health & safety and environmental standards alongside our quick response and flexibility to help solve our client's challenges.

Our facilities include:

- 120,000 square foot factory complete with crane capacity of over 100 tonnes
- Cutting Edge Machinery and technology available
- CNC Drilling lines and sophisticated plate profiling machinery
- 3D Design & Modelling software

Service we provide include:

- Engineering Services
- Design & Detailing
- Transparent & competitive pricing
- Dedicated project management
- Fabrication
- Erection

Some typical examples of sectors we provide structural steel solutions for include:

- Commercial
- Industrial
- Educational
- Community
- Leisure
- Retail
- Agricultural

Cairnhill is a provider of metalwork services.

Complementing our structural steel solutions, our metalwork services further enhances the full package we offer our many clients who take advantage of our one stop shop for any steel and metalwork requirements.

We have the expertise to assist our clients in the design of all aspects of metalwork including bespoke metal products. Our large metalwork workshop facility is fully equipped with the latest cutting, bending, drilling, punching and welding equipment.

We offer a wide range of specialist surface treatments and finishing coatings to further protect and enhance our finished products such as:

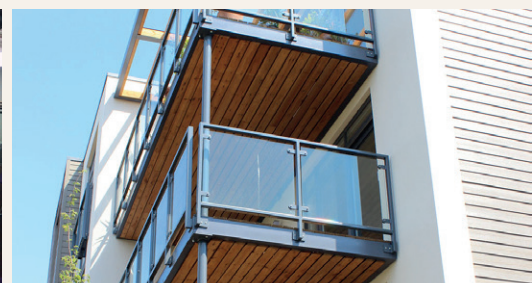

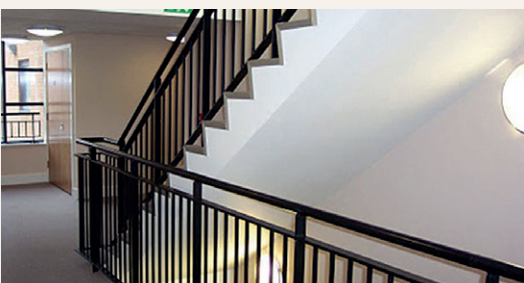

- Blast Cleaning
- Painting
- Galvanising
- Powder Coating

Some typical examples of our metalwork services and products we manufacture and install are:

- Staircases
- Balconies
- Balustrades
- Handrails
- Access Ramps
- Railings & Gates
- Barriers
- Shutters
- Steel Doors
- Automatic Doors
- Automatic Gates & Barriers
- On-Site Welding & Repairs
- Reactive maintenance
- Bespoke Design & Fabrication

Some typical examples of organisations that we provide metalwork services for are:

- Local Authorities
- Main Contractors
- Rail Providers
- Universities
- Emergency Services
- Health Services

Cairnhill supply and install all types of metal and timber fencing, providing fencing solutions for our customers throughout the UK.

With our proven expertise and commitment to quality and affordability we are a trusted fencing contractor for many of our clients providing fencing solutions for construction contractors, local authorities, schools, civil engineering contractors, and agricultural customers.

We supply and install a large range of metal fencing and gates. Some typical examples of metal fencing we provide are:

- Steel fabricated
- Security
- Playpark
- Sports
- Railings
- Palisade
- Chain link
- Estate
- Bespoke

We also supply and install timber fencing & gates. Some typical example include:

- Closeboard
- Palisade
- Panel
- Picket
- Hit and Miss
- Post and Rail
- Hoarding & security
- Stock
- Bespoke

Further enhancing our broad range of fencing solutions, we also carry out reactive maintenance and restoration services to both metal and timber fencing.

Cairnhill Sun Works Factory

120,000 square foot facility with crane capacity of 100 tonnes

Why we are different

At Cairnhill our excellent HSEQ performance is one of our core principals.

We take a highly proactive approach to managing health, safety, environmental and quality systems to create and maintain a safe environment at all Cairnhill facilities and projects.

Our HSEQ department audits, monitors and continually improves our management systems, which are based on the requirements of ISO 9001, ISO 14001 and OHSAS 18001.

We set ourselves demanding targets in this area and ensure that our HSEQ values are supported by personal objectives for the Management Team. To monitor our performance, we set active and reactive Key Performance Indicators.

By developing trust between employees, contractors and clients, we ensure that HSEQ issues are raised, tracked and closed effectively, thereby improving performance.
